SAULTY

Product description

SAULTY is a modern take on the classic Somersault Bars, designed for both climbing and somersaulting fun, ideal for urban environments.

Climb up via the Step Pad to the high bar or use the Step Bar to access both bars. The bars facilitate several activities, such as hanging, swinging, and sitting, which develop strength, balance, and spatial awareness. The dual-bar setup encourages social play as kids can interact, assist, and share experiences with peers.

SAULTY's minimalist and elegant design, combined with its versatile play functions, makes it an attractive and practical feature for any urban playground.
