CLIMBY 4

### Product description

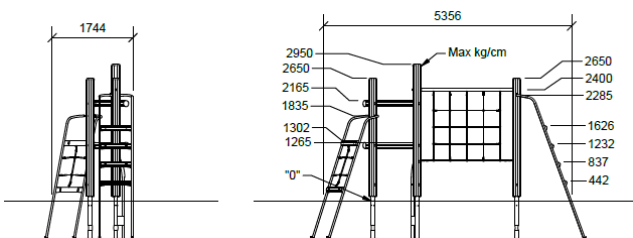

CLIMBY 4 brings elegant and simple design to urban spaces, providing straightforward and dynamic climbing fun. With multiple ways to climb on and off, children can move across the structure, exploring up, down, and all around.

This play equipment includes a Rope Ladder, Beam Ladder, Vertical Climbing Net, and Balance Beam with Rail, giving a thrill as they play off the ground. It challenges children's balance, strength, and coordination.

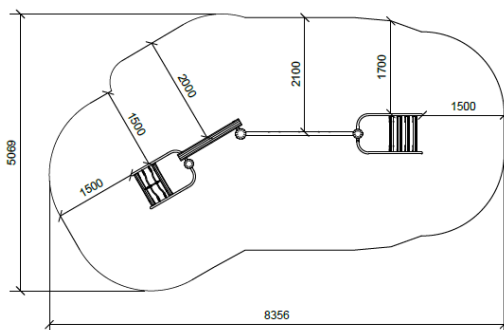

The open and elegant design of CLIMBY 4 is not just about climbing; it is a place for kids to engage with peers, offering a spot to hang out in the net or lend a hand to a friend climbing up.

Perfect for playgrounds in the city, CLIMBY 4 is a modern twist on traditional play equipment, adding value through design and function.
