SWINDY 1

Product description

SWINDY 1 merges the natural warmth of robinia wood with the strength of steel, crafting a dual-tire swing for any play space in the city.

This swing set invites children to play individually or have even more fun playing together, fostering cooperation and shared joy. The tire seats make it possible for two children to swing on the tire. The swing allows for standing, sitting, jumping off, and even lying on your stomach, exercising various muscle groups, training balance, coordination, and spatial awareness.

Designed for durability and timeless appeal, SWINDY 1 is an inviting addition to urban environments, adding value through design and function.
